Nervous System
- Brain stimulates pituitary gland to secrete oxytocin
  - Glands
  - Hormones
  - Hypothalamus

Circulatory System
- Oxytocin carried in bloodstream to uterus
  - Arteries
  - Veins
  - Uterus

Nerve impulses from cervix transmitted to brain
- Neuron
- Cervix

Head of baby pushes against cervix
- Tissue
  - Smooth muscle tissue

Oxytocin stimulates uterine contractions and pushes baby towards cervix

Positive feedback
